

# How to Run a Study on Amazon Mechanical Turk

## Create a Project

1. Go to [mturk.com](http://mturk.com)
2. Click on “Get Started with Amazon Mechanical Turk”
3. Click on “Create a Requester account”
4. Sign in with your Amazon account or create a new account
5. If you are running the study via a survey link (e.g., Qualtrics), click on the orange button “Create Project”

6. Now you are in the “Edit Project” page. On the “Enter Properties” tab, set up project properties. Below is an example:

7. Also, set up your HIT (human intelligence task; this is how MTurk calls a study)
  - a. Reward per assignment: how much you want to pay each participant (called MTurk Worker)

- b. Number of assignments per HIT: how many participants you want
  - i. For  $N < 10$ , MTurk charges 20% fee; for  $N \geq 10$  (almost always our case), MTurk charges 40% fee. Remember to include fees in your budget. See <https://requester.mturk.com/pricing> for more details of pricing
  - ii. If you are not sure, start small and monitor the results before recruiting thousands of participants; you can always publish more batches (i.e., recruit more participants) later
- c. Time allotted per assignment: the maximum time a Worker can work on your project (NOT estimated time for completion). Sometimes Workers might sign up before they finish other studies, so it's a good idea to leave generous amount of time (I do 2 hours) for Workers to complete your study with no rush
- d. HIT expires in: usually data come in very quickly, unless you require special qualifications (e.g., smokers)
- e. Auto-approve and pay: leave enough time so you are able to check the data, but not too long so Workers can get paid in a timely fashion

**Setting up your HIT**

Reward per assignment  This is how much a Worker will be paid for completing an assignment. Consider how long it will take a Worker to complete each assignment.

Number of assignments per HIT  How many unique Workers do you want to work on each HIT?

Time allotted per assignment   Maximum time a Worker has to work on a single task. Be generous so that Workers are not rushed.

HIT expires in   Maximum time your HIT will be available to Workers on Mechanical Turk.

Auto-approve and pay Workers in   This is the amount of time you have to reject a Worker's assignment after they submit the assignment.

- 8. Set up Worker requirements (what type of participants you want)
  - a. Require Workers to be Masters: a group of Workers who have been assigned the qualification of Masters because they “consistently demonstrate accuracy” in their work. There will be an additional charge
  - b. Specify additional qualifications
    - i. I usually specify a HIT approval rate of at least 95%
    - ii. There is an additional charge for premium qualifications
    - iii. You can set up your own qualifications. For example, if you don't want people who participated in a previous project to participate in your current project, you can create a qualification “Previous Participant” and assign it to previous participants, and exclude people who have this qualification. For details, see [https://docs.aws.amazon.com/AWSMechTurk/latest/RequesterUI/Creating\\_aQualificationType.html](https://docs.aws.amazon.com/AWSMechTurk/latest/RequesterUI/Creating_aQualificationType.html) (creating a qualification type),

<https://docs.aws.amazon.com/AWSMechTurk/latest/RequesterUI/AssigningQualificationTypetoaWorker.html> (assigning a qualification to a specific Worker), and <https://docs.aws.amazon.com/AWSMechTurk/latest/RequesterUI/ManagingWorkerDetailsOffline.html> (assigning a qualification to multiple Workers at once)

**Worker requirements**

Require that Workers be Masters to do your HITs (Who are Mechanical Turk Masters?)

Yes  No

Specify any additional qualifications Workers must meet to work on your HITs:

-- Select -- Remove

(+) Add another criterion (up to 4 more)

(Premium Qualifications incur additional fees, see [Pricing Details](#) to learn more)

Project contains adult content (See details)

This project may contain potentially explicit or offensive content, for example, nudity.

9. Now you've finished setting up project properties. At the bottom of this page, click on "Design Layout." This is how you want the study page to look
  - a. Remind Workers to leave the window open, and come back to provide the survey code after they complete the survey
    - i. In your Qualtrics survey, remember to generate a random code for every participant so they can enter the code here. To set this up in Qualtrics, see <https://blog.mturk.com/tutorial-getting-great-survey-results-from-mturk-and-qualtrics-f5366f0bd880> (the part on "Generating a Completing Code in Qualtrics")
  - b. Paste your survey link after "Survey link:"

Format Font U I B A Ix

**Survey Link Instructions** (Click to expand)

Earn \$1.00 by letting us know your perceptions about social media messages! You will read a message on social media and will rate your agreement with a list of statements. Takes less than 10 minutes.

Select the link below to complete the survey. At the end of the survey, you will receive a randomly generated code to paste into the box below to receive credit for taking our survey. **Make sure to leave this window open as you complete the survey.** When you are finished, you will return to this page to paste the code into the box.

Survey link:

Provide the survey code here:

10. Click on "Preview," make sure everything looks good, and click on "Finish"

11. Yay now you have a project! To recruit Workers, click on “Publish Batch,” click on “Next.” You probably need to sign in again, and the next page shows the cost summary (including reward to Workers and MTurk fees)
12. Enter your payment information, click on “Purchase & Publish”
13. You will receive a confirmation email that the payment was received. And you will be led to a page where there is a progress bar showing how many Workers have completed your project. It will be filled up quickly!

## Manage Projects

14. Don't forget to pay Workers (especially if you didn't set up auto-pay). On the top of the webpage, go to “Manage”

- a. Under “Results,” you can see the progress of each batch you’ve published; click on one to see details of that batch and pay Workers
- b. Under “Workers,” you can see a list of the Workers who completed your projects. If you want to block/unblock or assign a qualification type to multiple Workers, download the .csv file, make changes in the file, and upload it to the webpage
- c. Under “Qualification Types,” create and customize your own qualifications

### Manage Qualification Types

Below is a list of your Qualification Types and the corresponding number of Workers.

Create New Qualification Type

Qualification Types					
	Name ▼	ID	Workers who have this Qualification	Creation Date	Description
